AUTHOR INDEX TO VOLUME 16

Banaszek, J., 59
Bialecki, Ryszard, 79
Burns, Patrick J., 97

Chen, C.-P., 193

Delaunay, D., 125

Frankel, J. I., 231

Hsieh, C. K., 245
Husain, S. R., 31

Jarny, Y., 125

Karki, K. C., 143
Kettleborough, C. F., 31
Kim, S.-W., 193

Lee, Shong-Leih, 161

Meric, R. A., 213
Mohamad, A. A., 179
Mongia, H. C., 143
Murthy, Jayathi Y., 1, 17

Nahlik, Roman, 79

Patankar, Suhas V., 1, 17
Prakash, C., 31
Pryor, Daniel V., 97

Shang, Hanji, 245

Vanka, S. P., 143
Viskanta, R., 179

SUBJECT INDEX TO VOLUME 16

Boundary condition dissection method for the solution of boundary-value heat conduction problems with position dependent convective coefficients, 245

Comparison of control volume and Galerkin finite element methods for diffusion-type problems, 59
Control-volume-based finite-element method, 31

Duct flows. Part I: Formulation, 1
Duct flows. Part II: Test problems, 17

Evaluation of different discretization schemes for natural convection of low-Prandtl-number fluids in cavities, 179

Finite-element methods, 31, 59
Fluid flow calculations using a multigrid method and an improved discretization scheme, 143

Galerkin finite element and control volume methods, 59
Green's function solution to heat transfer of a transparent gas through a tube, 231

Heat transfer of a transparent gas through a tube, 231

Multiple-time-scale turbulence model based on variable partitioning of the turbulent kinetic energy spectrum, 193

Nonlinear steady-state problems by BEM, 79
Numerical resolution of a phase change problem with zero latent heat, 125

Partially parabolic calculation procedure for duct flows in irregular geometries:
Part I: Formulation, 1
Part II: Test problems, 17
Phase change problem with zero latent heat, 125

Schemes for natural convection in cavities, 179
Sensitivity analysis and optimization for joule heating with temperature-dependent conductivities, 213
Solution of fluid flow problems with the vorticity-streamfunction formulation and the control-volume-based finite-element method, 31
Solver for two-dimensional elliptic equations, 161
Solving nonlinear steady-state potential problems in inhomogeneous bodies using the boundary-element method, 79
Strongly implicit solver for two-dimensional elliptic differential equations, 161

Vector and parallel Monte Carlo radiative heat transfer simulation, 97

CONTENTS OF VOLUME 16

NUMBER 1

1 A Partially Parabolic Calculation Procedure for Duct Flows in Irregular Geometries. Part I: Formulation **Jayathi Y. Murthy and Suhas V. Patankar**

17 A Partially Parabolic Calculation Procedure for Duct Flows in Irregular Geometries. Part II: Test Problems **Jayathi Y. Murthy and Suhas V. Patankar**

31 Solution of Fluid Flow Problems with the Vorticity-Streamfunction Formulation and the Control-Volume-Based Finite-Element Method **C. F. Kettleborough, S. R. Husain, and C. Prakash**

59 Comparison of Control Volume and Galerkin Finite Element Methods for Diffusion-Type Problems **J. Banaszek**

79 Solving Nonlinear Steady-State Potential Problems in Inhomogenous Bodies Using the Boundary-Element Method **Ryszard Bialecki and Roman Nahlik**

97 Vector and Parallel Monte Carlo Radiative Heat Transfer Simulation **Patrick J. Burns and Daniel V. Pryor**

125 Numerical Resolution of a Phase Change Problem with Zero Latent Heat **Y. Jarny and D. Delaunay**

NUMBER 2

143 Fluid Flow Calculations using a Multigrid Method and an Improved Discretization Scheme **K. C. Karki, S. P. Vanka, and H. C. Mongia**

161 A Strongly Implicit Solver for Two-Dimensional Elliptic Differential Equations **Shong-Leih Lee**

179 An Evaluation of Different Discretization Schemes for Natural Convection of Low-Prandtl-Number Fluids in Cavities **A. A. Mohamad and R. Viskanta**

193 A Multiple-Time-Scale Turbulence Model Based on Variable Partitioning of the Turbulent Kinetic Energy Spectrum **S.-W. Kim and C.-P. Chen**

213 Sensitivity Analysis and Optimization for Joule Heating with Temperature-Dependent Conductivities **R. A. Meric**

231 Green's Function Solution to Heat Transfer of a Transparent Gas Through a Tube **J. I. Frankel**

245 A Boundary Condition Dissection Method for the Solution of Boundary-Value Heat Conduction Problems with Position-Dependent Convective Coefficients **C. K. Hsieh and Hanji Shang**
